EDUCATION

Sorbonne University

PhD in Neuroscience part of the i-Bio program and FRM-FDT Fellowship

Paris, FR

Oct. 2022 – Actually

Edmond and Lily Safrá International Institute of Neurosciences

Master in Neuroengineering

Macaíba, RN, BR

Aug. 2019 – Jul. 2021

Pontifical Catholic University of Minas Gerais

Bachelor of Physiotherapy

Belo Horizonte, MG, BR

Aug. 2014 – Jul. 2019

EXPERIENCE

PhD Student

Sorbonne University

Set. 2021 – Oct. 2022

Paris, FR

- PhD student in the team led by Dr. Girardeau and part of the i-Bio program, working with electrophysiological analysis and computational modeling under the supervision of Dr. Girardeau and Dr. Nicola (Calgary University). During the Pre-Doc, worked with gene expression in the Global regulation for bacterial adaptation group with Dr. Sclavi, and with calcium image at Development of the spinal cord organization lab with Dr. Mangin.

Technical Support

Edmond and Lily Safrá International Institute of Neurosciences

Set. 2021 – Oct. 2022

Macaíba, RN, BR

- I did analysis of electrophysiological data using signal processing, brain connectivity and machine learning, techniques. Also, assisting in writing scientific articles.

Master Student

Edmond and Lily Safrá International Institute of Neurosciences

Aug. 2019 – Jul. 2021

Macaíba, RN, BR

- During my master I worked with data analysis using Python, performing multi-modal data fusion, application of machine learning algorithms, video and neural data analysis.
- Experience in animal behavior, electrophysiological data analysis and surgery for electrode implantation.
- I also had the opportunity to participate in the writing and submission of funding proposals with the approval of two grants.

Member of Machine Learning Research Group

Edmond and Lily Safrá International Institute of Neurosciences

Mar. 2020 – Oct. 2022

Macaíba, RN, BR

Study group for weekly discussion of machine learning and deep learning articles and techniques. During these discussions we developed a series of projects.

- We developed projects and implemented machine learning techniques (pose estimation, autoencoder, SVM, t-SNE, GAN and others). Developed jupyter/colab notebooks tutorials.

PROJECTS

i-Bio Summer School

Sorbonne University - i-Bio program

Aug. 2023 – Aug. 2023

Banyuls-sur-Mer, FR

I worked as teaching assistant in the i-Bio Summer School: Advanced Computational Analysis for Behavioral and Neurophysiological Recordings”, which took place in Banyuls-sur-Mer, August 6-12 2023. During that summer school, practicals were organized into two groups that worked on different datasets. I was part of the group that worked on electrophysiological recordings performed in the hippocampus and the amygdala while the animal performed a navigation task and during subsequent periods of sleep.

C.I.T.R.O.N.S

May. 2023 – Aug. 2023

Sorbonne University - IBPS - DSCO lab

Paris, FR

C.I.T.R.O.N.S (Calcium Imaging Treatment using ROIs; Numpy & Scipy) is an pipeline that I developed in Python using the pyimagej and scijava libraries to enable the use of ImageJ functions through Python and treat the images. The pipeline has been used in current and old laboratory data.

Bacteria

Jan. 2023 – May. 2023

Sorbonne University - IBPS - BIG Lab

Paris, FR

I developed an pipeline to analyze image data using SuperSegger and Omnipose, a library to process this data, called Bacteria and also the 3D modeling designs to fix the plate with PDMS to the centrifuge and distribute the bacteria in all channels of the microfluidic device.

PyRat

Aug. 2020 – Oct. 2022

Edmond and Lily Safra International Institute of Neurosciences

Macaíba, RN, BR

We used DeepLabCut to correlate brain oscillations and behavior, evaluate the object recognition task, quantifying the time spent on objects, detachment speed, head orientation and path preferences. For this, Python in Rodent Analysis and Tracking (PyRat) was developed, a library to analyze tracking outputs.

JAMA/PyJama

Aug. 2019 – Oct. 2022

Edmond and Lily Safra International Institute of Neurosciences

Macaíba, RN, BR

JAMA is an open access device designed to perform motion analysis using inertial measurement units and microcontrollers. PyJama is a python library for analyzing human kinematics data from types of devices.

Brain connectivity in rats with epilepsy

Sept. 2021 – Oct. 2022

Edmond and Lily Safra International Institute of Neurosciences

Macaíba, RN, BR

This project aims to characterize the effects of pentylentetrazole on brain connectivity (electrophysiology).

TECHNICAL SKILLS

Programming Languages: Python, MATLAB, C/C++, Pascal, Med State Notation, LaTeX

Developer Tools: GitHub, Google Colab, VS Code, Platform IO, Arduino, Jupyter, Anaconda

Libraries: pandas, NumPy, Matplotlib, Bokeh, FastAI, PyTorch, FastAI, TensorFlow, scikit-learn, flask

Equipaments: Intan, Plexon, Blackrock, Stereotaxic, Med associates behavioral setup

FUNDINGS

FRM Fin de Thèse de Science Fellowship, Foundation pour la Recherche Medicale, competitive national 4th-year PhD fellowship in France

Collaborative Research Grants by IBRO alongside with Dr.Gabrielle Girardeau and Dr.Wilten Nicola

Pre-Doc and PhD fellowship by Initiative for Biology (i-Bio) for interdisciplinary research in Biology

Master's scholarship by Coordenação de Aperfeiçoamento de Pessoal de Nível Superior

FREE TIME

Brazilian Jiu-Jitsu Black Belt and Elite Marathon Runner
